

## **Computational and Theoretical Chemistry Group at USFQ: Generalities, Perspectives, and Research**

Javier Torres, Universidad San Francisco de Quito, Ecuador

The present talk is intended to provide a general view of the different activities conducted at the USFQ's Computational and Theoretical Group (QCT-USFQ), which obeys to the recent scientific development that is being pursuit in Ecuador (South-America). Emphasis is done in the current perspectives of the Research Group and the directives that are defining its participation in the international scenario. A brief summary of different Research Projects (previous/current/future) carried out at QCT-USFQ will be also presented.
